Classic Brew

Classic Brew

Tailor-make the coffee to your own taste. Make up to 95 litres of freshly brewed coffee an hour during peak periods of the day or just a few litres, if requested. The coffee brewer is capable of refilling itself, and by means of a timer it adjusts the amount of coffee brewed, ensuring fresh coffee with a minimum of waste. The coffee brewer is equipped with 2x5 litres removable coffee containers. The additional satellites make the Classic Brew exceptional for the buffet, canteen, or conference room. The coffee brewer is easy to operate and needs only a mini-mum of cleaning. Classic Brew is made in stainless steel and of the Danish, classic design that characterizes all Scanomat coffee brewers.

The automatic coffee brewer combines the traditional coffee brewer appearance with advanced technology. The amount of coffee is adjusted by means of a timer.

Classic Brew Roma

Med Classic Brew Roma kan kaffeserveringen "skræddersyes". Det er muligt, at brygge op til 95 liter korrekt doseret friskbrygget kaffe pr. time i travle perioder eller få liter i mindre travle perioder.

Kaffebryggeren har indbygget timer-funktion og kan forprogrammeres til kaffebrygning på udvalgte tidspunkter, herved minimeres et eventuelt kaffespild. Kaffebryggeren er kombineret med den traditionelle Classic Brew Roma kaffebeholder i venstre side af maskinen og med muligheden for at i højreside af maskinen at brygge alverdenens kaffespecialiteter. Kaffebryggeren er udstyret med kaffebeholdere, der kan rumme 5 liter. Som ekstra tilbehør kan der leveres en satellit. Satellitenheden er ideel til buffeten, frokoststuen eller kursuslokalet. Tevand udskænkes direkte fra fronten af maskinen. Maskinen er meget brugervenlig og kræver kun minimal rengøring.

Classic Brew Roma er, som kendetegnet for Scanomats dansk designede og producerede kaffebryggere, kompakt konstrueret og udført i et stilrent design i rustfrit stål.

Roma Kaffespecialiteter:
